Technical Requirements

- The performance must take place in a quiet, draught-free space.
- Provide 3 suspension points for the circular structure (less than 20 kg static load per suspension point).
- If no suspension points are available, we have lifting stands for the structure.
- We provide all rigging hardware (straps, slings, carabiners, etc.).
- Minimum height: 2.50m.
- Minimum floor space: 5 m × 5m.
- Provide a 220 V / 16 A power supply with a powerstrip.
- We are self-contained for sound and lighting.
- **Set-up:** 4 hours the day before, or on the day of the performance.
- **Strike:** 2 hours after the final performance.

These are ideal technical conditions; we can adapt where possible.

Stage Plan
